1. Student Overview

FULL NAME

Ayush Yadav

STUDENT REGISTRATION NUMBER (SRN)

R25EJ020

PROGRAMME

B.Tech — Computer Science & IT
(CSIT)

SEMESTER

3rd Semester

GITHUB HANDLE

apexash-09

LEETCODE HANDLE

apexash-09

A passionate Computer Science & Information Technology student focused on software engineering, web development, and algorithmic problem-solving. Constantly building projects, honing complexity analysis, and exploring open-source technologies. The live portfolio is built with an **Apex Space Obsidian Dark Glassmorphism** theme and deployed on GitHub Pages.

2. Coursework Activities & Projects

The following three project cards are documented in the portfolio, summarising Activities 1 through 4:

// ACTIVITY 01

Hello World & Git Foundations

Established GitHub workflow, repository management, version control fundamentals, and deployed initial web projects using GitHub Pages. Covers git init, commit, push, branching, and GitHub Pages deployment workflow.

Git

GitHub

Version Control

HTML/CSS

GitHub Pages

// ACTIVITY 02

Pair Programming Collaboration Log

Collaborative software development practice documenting driver-navigator roles, code reviews, pull requests, and git merge conflict resolution. Demonstrates understanding of team-based development workflows and agile collaboration.

Git Collaboration

Markdown

Peer Code Review

Pull Requests

// ACTIVITIES 03 & 04

Algorithmic Problem Solving Repository & LeetCode

Structured repository tracking daily algorithmic challenge solutions, time/space complexity analysis (Big-O), and optimised Data Structures & Algorithms implementations. Solutions span arrays, linked lists, trees, graphs, dynamic programming, and sorting algorithms. Live profile: leetcode.com/u/apexash-09

C++

Java

Python

Data Structures

Algorithms

Big-O Analysis

3. Technical Skills

Category	Skills
Languages	C++, Java, Python, JavaScript, HTML5, CSS3
Tools & Platforms	Git, GitHub, VS Code, GitHub Pages
Core CS Concepts	Data Structures & Algorithms, Object-Oriented Programming (OOP), Version Control, Web Development
Competitive Platforms	LeetCode (apexash-09)

4. 1-Year Career & Learning Goal

 TARGET MILESTONE — 2026–2027

"To contribute to impactful open-source projects, master advanced full-stack development, and prepare for competitive open-source programs and global tech internships."

Prompt Log — AI-Assisted Portfolio Development

Complete record of every prompt submitted and the corresponding change made to the portfolio.

Prompt History (8 Iterations)

Each entry shows the exact prompt, the timestamp, and a one-line summary of what changed in the portfolio.

01

INITIAL PROMPT — PORTFOLIO CREATION

30 Sep 2026 · 22:24

"Create a single-page personal portfolio website as a standalone index.html file with Dark Mode Glassmorphism theme. Include About, Projects (Activities 1–4), Skills, Career Goal, and Contact sections. Name: Ayush Yadav, CSIT Student, B.Tech 3rd Semester. Use GitHub info already known."

CREATED

Built the complete single-page portfolio (index.html) with full glassmorphism CSS, all 5 sections, GitHub handle apexash-09, email apexms0905@gmail.com, and 3 activity project cards.

02

TERMINAL EXECUTION

30 Sep 2026 · 22:32

"yu only do this in terminal"

DEPLOYED

Ran git init, git add, git commit in terminal — initialised the local repo and committed index.html.

03

DESIGN REDESIGN — APEX SPACE THEME

30 Sep 2026 · 22:40

"use designs and best animations like this colour too" [uploaded screenshot of Apex Space app with obsidian dark sidebar, glassmorphic cards, and cyan accent palette]

REDESIGNED

Complete visual overhaul — Apex Space obsidian dark theme, fixed sidebar nav, animated grid background, live search bar, copy-email toast, scroll-based nav highlight, Plus Jakarta Sans font.

04

GUIDANCE REQUEST

02 Oct 2026 · 18:06

"so next wt should i do"

ADVICE No code change — provided 5 recommended next steps: deploy to GitHub Pages, link real repos, add real LinkedIn, build DSA repo, and create a GitHub profile README.

05 GITHUB PUSH ERROR — REMOTE ORIGIN EXISTS

02 Oct 2026 · 18:11

"error: remote origin already exists." [pasted PowerShell error from git remote add origin https://github.com/apexash-09/csit-portfolio.git]

FIXED Used git remote set-url to point origin to csit-portfolio, committed, and pushed successfully to GitHub.

06 GITHUB PAGES 404 ERROR

02 Oct 2026 · 18:17

"y though ??" [uploaded screenshots: 404 error on apexash-09.github.io/csit-portfolio and GitHub Pages settings showing site live]

FIXED Root cause: git repo was initialised at C:\Users\apexm\ so index.html was committed as OneDrive/Desktop/index.html, not at root. Re-initialised a clean repo in C:\Users\apexm\csit-portfolio\ and force-pushed with index.html at root level.

07 SRN & LINKEDIN UPDATE

02 Oct 2026 · 18:31

"in the file beside csit add SRN:R25EJ020 and in contact add this linkedin profile when someone click gets redirected www.linkedin.com/in/ayushy09"

UPDATED Added SRN R25EJ020 in cyan monospace beside CSIT B.Tech in the topbar; updated LinkedIn href from placeholder to linkedin.com/in/ayushy09.

08 LEETCODE PROFILE LINK

02 Oct 2026 · 18:40

"in that algorithmic and leetcode put this so if anyone clicks there it takes them to leetcode my profile" [uploaded screenshot of LeetCode Settings showing ID: apexash-09]

UPDATED Changed the DSA project card's "Explore Solutions" link from GitHub to leetcode.com/u/apexash-09 and updated button text to "View LeetCode Profile".

Iteration Summary

#	Action Type	What Changed
01	CREATED	Full portfolio built from scratch
02	DEPLOYED	Committed to local git repo via terminal
03	REDESIGNED	Apex Space dark obsidian theme + animations
04	ADVICE	Guidance on next steps (no code change)
05	FIXED	Resolved remote origin conflict, pushed to GitHub
06	FIXED	Fixed 404 — moved index.html to repo root
07	UPDATED	Added SRN R25EJ020 + correct LinkedIn URL
08	UPDATED	Linked DSA card to LeetCode profile
